**Instructions for fitting**

1. Prepare to use respirator
   - Place the respirator against your face, with the bottom under your chin and nosepiece across bridge of your nose.
   - Pull the headbands over your head and position the headbands across the nape of your neck.
   - Next, pull the bottom elastic band over your head and place around the neck below your ears.
   - Adjust the headband for a proper and comfortable fit. If the headband is at either side of the inside of your head, push out the buckle for a better fit.

2. Place respirator on face
   - Using both hands, bend the nosepiece to fit snugly against your nose and face. The respirator may not fit as well if you adjust the nosepiece using one hand. Use both hands.
   - Slide fingers down both sides of the nosepiece to seal it against your nose and face.

3. Adjust the headband
   - Completely cover the middle panel of the respirator with one or both hands.
   - Do not push the respirator against your face. With your hands in place on the surface of the respirator, exhale, or breathe out sharply.
   - If you feel any air leaking on your face or eyes, the respirator needs to be adjusted. To adjust, stretch the headbands again by pulling them back together. When the respirator is a good fit, you will not feel any air blowing on your face or eyes. Return eyewear to face, if applicable.

4. Check the face seal

**Warning**

This section contains critical information for the safe and effective use of the respirator:

1. Do not use this mask as protection against toxic particles, gases, or vapors, solvents from spray-painting operations, or in explosive atmospheres.
2. Do not use this mask in toxic gases, fumes, or solvents from spray-painting operations, or in explosive atmospheres.
3. This mask should not be worn when conditions prevent a good fit to face piece, such as conditions include the growth of beard or mustache and hemostasis and the use of spectacles or any other devices containing temper or othus which pass between the filter sealing edges and the wearer's face.
4. Leave the work area immediately if breathing becomes difficult or dizziness or any other sign of distress occurs.
5. It is not allowed to use the mask without proper fit.

**Proper fit of the respirator is critical to reducing wearer exposure to airborne germ. It is important to read User Instructions carefully.**

**CHAMPAK A520CS RESPIRATOR**

Champan A520CS is a NIOSH certified N95 respirator, and is indicated to be used by the healthcare personnel during procedures to protect both the patient and the healthcare personnel from the transfer of microorganisms, body fluids, and particulate matters.

- Single-use only. Do not re-use.
- Non-sterile

**Storage**

The respirator should be placed in a container and stored in a clean cool and dry atmosphere to ensure that it is protected against dust, chemicals, moisture, excessive heat and direct sunlight.

- 5°C to 40°C
- <80%

LOT:

**THIS RESPIRATOR IS APPROVED ONLY IN THE FOLLOWING CONFIGURATION:**

<table>
<thead>
<tr>
<th>TC</th>
<th>Protection</th>
<th>Respirator Cautions and Limitations</th>
</tr>
</thead>
<tbody>
<tr>
<td>N95</td>
<td>Particulate Filter (95% filter efficiency level) effective against particulate aerosols free of oil, time use restriction may apply.</td>
<td>A - Not for use in atmospheres containing less than 19.5 percent oxygen. B - Not for use in atmospheres immediately dangerous to life or health. C - Do not exceed maximum use concentrations established by regulatory standards. J - Failure to properly use and maintain this product could result in injury or death. M - All approved respirators shall be selected, fitted, used, and maintained in accordance with MSHA, OSHA, and other applicable regulations. N - Never substitute, modify, add, or omit parts. Use only exact replacement parts in the configuration as specified by the manufacturer. P - NIOSH does not evaluate respirators for use as surgical masks.</td>
</tr>

---

**Instructions for use**

This section contains critical information for the safe and effective use of the respirator:

1. This mask must not be used for more than single shift (8 hours). Always discard and replace the mask when the breathing resistance becomes excessive or at the end of every working shift.
2. No alteration or modification is allowed. Never use damaged masks; in that case discard these masks.
3. The wearer of the mask must be well trained to use properly before starting work. Facial hair (beard or sideburns) of the user within the area of the sealing edges of the mask may jeopardize the protection efficiency of the mask itself.
4. Before use of these respirators, a written respiratory protection program must be implemented, meeting all the requirements of OSHA 29 CFR 1910.134, including training, medical evaluation and fit testing.
